NET SCRIPT
Hawaii/Mainland Allstar Net
DTG: <u>1600HST / 0200UTC</u>

Good evening. This is _____ (call sign) activating the Hawaii/Mainland Allstar Net.
The name here is _____. I will be your Net Control.

The purpose of this net is to teach the protocols and procedures of a Net. As always, Constructive feedback is encouraged. All licensed amateurs are invited to check in and participate. We would like to thank all node sysops in this group for the use of the network.

This is a formal net, with all net activities directed through net control. We encourage the use of ITU phonetics. The use of the word "break" should only be used to interrupt regular net operations in the event of an emergency.

This net covers the Allstar networks located on All the Hawaiian Islands and many states in the continental US and beyond.

We have RF Links comprised of VHF and UHF repeaters and simplex nodes. RF Links have 3-minute timers. There is also some occasional internet delay in the system Therefore, we encourage users to do a <u>minimum</u> 2 second reset every minute or so between your transmissions. Also, when you key up, wait 2 seconds before speaking. This will ensure all transmissions are heard by everyone.

This concludes the preliminary announcements.

(Insert a break) 2 second break

At this time we'll proceed with check-ins....... Again! …. When checking in, <mark>please give your **call sign** **twice** using ITU phonetics, followed by **your name** and **location**. I will be verifying check-ins so please leave space for net control to respond after each check-in.</mark>

Following the check-ins, we go through the list for one round of comments by everyone unless you advise during your check-in that your in and out – which means you have nothing for the net and we'll proceed on with the next check-in for comments.

(Note: It is at your digression on how you want to do check-ins as N.C... Suggestions would be Guests and those first-time users of this system first so all can welcome them to the system. Makes a good impression. You can start anywhere or if you want, just take check-ins if can work the pile-up. If you do Island by Island and mainland time zones, when finished be sure to make a call for anyone anywhere as stations from other than the USA may want to check in.)

Stations please come now:

Use a numbered Log Sheet to keep track of check-ins count.

Per my count, we have _____ stations checked in. Anyone concur? _____

Are there any final announcements for this evening's net?

Do we have any stations with any comments, questions or other traffic for the net?

Please feel free to hang out after the net for the rag chew session.

This net is voluntary and everyone is invited to participate as net control or alternate net control: If you would like to act as net control, contact either one of the following system administrators; NH6HI, WH6AV, AH6OD or KH6IN and they/we will schedule you in. Email addresses are good in Q R Zed. This is a good chance for you to hone your skills in the event that you happen to be first responder in an emergency situation.

Join us every Sunday at 15:30 HST (that's Monday at 01:30 UTC) starting with Amateur Radio Newsline and followed by the Net at 16:00 HST or 0200 UTC.

(insert your salutation)

The net is officially closed at _____ hrs. UTC

This is _____
            your callsign
